DETAILED ACTION

Applicant's submission, filed 1 July 2009, has been entered and acknowledged by the examiner.

Applicant's arguments with respect to the rejections of the claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Fujitani et al. (WO 02/102732 - examiner is relying upon USPN 2004/0232839 for citations).

With regard to claim 1,

Fujitani et al. disclose in at least figure 1 and paragraphs 19-24 a plasma display panel comprising: a front panel (101) comprising a display electrode (103) a dielectric layer (104) and a protective layer (105) formed on a first glass substrate (102); a back panel (111) confronting the front panel (101) and including an address electrode (113), a base dielectric layer (114), a barrier rib (115), and a phosphor layer (116) sequentially formed on a second glass substrate (112), the front panel and back panel being disposed so as to confront each other and being sealed at outer walls of the front panel and back panel with a sealing member so as to form an inner space between the protective layer of the front panel and the phosphor layer, barrier rib,

and base dielectric layer of the back panel; and first and second catalysts (CoO, Ti) provided on at least one of the base dielectric layer, the barrier rib and the phosphor layer so as to be exposed to the inner space and react with a hydrocarbon existing in the inner space, wherein the first catalyst (CoO) is at least one of a catalyst which accelerates oxidation of a hydrocarbon and is selected from the group consisting of Pd, Pt, Rh, Co₃O₄, Mn₂O₃, CoO, and NiO, and wherein the second catalyst (Ti) accelerates decomposition of a hydrocarbon and is selected from the group consisting of Co, Ti, and Ni.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
